

ANSWERS TO YOUR FOLLOW UP QUESTIONS FROM OUR MEETING EARLIER THIS WEEK

- Could you explore if WAEC have any restrictions on using their pass papers without a partnership (i.e. what copyright/Intellectual property protection they have in place) You could also explore the possibility of a partnership?
Answer:
 - We made some phone calls and its confirmed that WAEC does have some restrictions against copying and distributing the past exam questions. You need to seek their permission in order to do so. We have drafted a letter to that effect.
- To appeal to a greater subset of learners, how can you shift the content beyond WAEC and standardized exams?
Answer:
 - To increase the market size, we could include a content targeting younger school going kids. For example: video lessons for nursery and primary school kids.
 - We could also include a library for kids to download soft versions of their course materials. Less fortunate students can use the app to access text books that are too expensive for them to buy.
- What are other options for quality content?
Answer:

As mentioned above, the following content could be added to make the app more appealing to students, apart from the interactive exam questions.

 - Video Content
 - Library
- What is your vision for students who use this software?
Answer:
 - GAMQUIZ: To have fun while learning, which would subsequently increase their overall performance as students.
 - EDUCARE: To ease the means by which your school records are available to you; Assignments, test scores, attendance etc
 - GAMSTUDY: To make quality education accessible to a student at the remotest part of the country.
- What is your vision for parents who use your software?
Answer:
 - EDUCARE: To ease the means by which they get involve in their children's education.
- What is your vision for schools who use this software?
Answer:
 - EDUCARE: To have a centralized system where they managed all activities of the school.
 - GAMSTUDY: To make remote learning accessible to them during pandemics or school breaks.

- GAMSTUDY for post covid-19
 - Please look again to see who you can target?

Answer:

 - Our target is students at the remotest part of the country who may not have access to quality education due to insufficient amount of teachers.
 - Also private schools could adopt the platform for remote learning during long holidays.
- How else can you make Gam Study work? what other partnership could you explore?

Answer:

 - We have not given that much thought, we'd have to do more research to see if there are other ways we could make GamStudy work.
- Have you spoken to some teachers about the content/software?

Answer:

 - Yes we have, we spoke to about 5 teachers, and all of their feedback is positive. Of course we'll do more feasibility studies to be assure of the exact type of content that'll be appealing to students.
- Can you please jot down a few qualities you're looking for interns, the benefit to the interns and also the type of work you would like them to undertake?

Answer:

 - Qualities:
 - Good team player
 - Good oral and writing skills.
 - Moderate public speaking skills
